

6-Week Project Timeline

Week 1: Introduction and Planning

Assignments:

- Introduction to the project theme and objectives.
- Formation of groups and role assignments.
- Initial brainstorming and research on the project topic.

Week 2: Research and Conceptualization

Assignments:

- Submit a research summary related to the project.
- Outline the project concept or design (depending on the project).

Week 3: Initial Development

Assignments:

- Begin developing the project based on research and initial designs.
- Draft the initial version of written content, design layouts, or mathematical models.

Week 4: Development Continuation

Assignments:

- Submit a progress report detailing what has been accomplished and what remains.
- Continue development of the project, incorporating feedback from the progress report.

Week 5: Finalization and Review

Assignments:

- Finalize the project, ensuring all components are complete.
- Review and refine the project based on peer or teacher feedback.

Week 6: Presentation and Submission

Assignments:

- Present the project to the class, highlighting key findings, designs, or analyses.
- Submit the final project documentation, including any written reports, visual materials, or digital content.
